

# 6.S078 Planning Algorithms, Fall 2013

October 14, 2013

## Assignment 4 (due Wed. Oct 23 before class)

- Please do the assignment described here:  
<http://www.csee.umbc.edu/courses/graduate/671/fall12/hw/hw6/>  
so as to get acquainted with the standard technology for symbolic planning.
- If you have trouble with the Blackbox planner, you might try the FF-X planner, which needs to be compiled but seems to compile easily on Linux and Mac (I have not tried Windows):  
<http://fai.cs.uni-saarland.de/hoffmann/ff.html>
- **Please try to install and execute the a simple example as soon as possible, so you can tell if you're going to have installation issues. If you have trouble, tell me right away.**
- Please send email to ask for any clarifications.
